## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112<sup>1</sup>***

Claims 3-10 are rejected under 35 USC 112, first paragraph. The subgeneric concepts of these claims lack description in the specification as filed. The reaction scheme on pages 16 and 17 is noted but not seen to support these new subgenera. It is particularly noted that the reaction scheme shows one specific species for each reaction step. It is not seen that each species amount to the same thing as the now claimed subgenera

### ***Double Patenting***

Claims 2-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,620,950 for reasons of record. The fact that a restriction was required in the parent application does not avoid the rejection. First, applicants did not limit the claim to the elected invention in the parent application. Second, after applicants traversed the restriction requirement in the parent application, the examiner allowed the claim including the nonelected subject matter. In effect, the restriction requirement was rendered moot by the examiner's allowance of the all the claimed subject matter. The fact that the instant

<sup>1</sup> The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 112 that form the basis for the rejections under this section made in this Office action:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1621

application was filed before the parent application issued as a patent is not material to the issue at hand. However, it is noted the notice of allowance was issued April 29, 2003 and applicants paid the issue fee July 1, 2003 in the parent application. Both dates are well before applicants filed the instant application on August 7, 2003. That is, at the time applicants filed the instant application they were well aware of the claimed subject matter that was to issue as the patent.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
